1. Would you prefer all coding is done with chatgpt and more in concepts or learn through trial and error (actual coding)?

I'd prefer learning coding through trial and error. I thoroughly enjoyed PLS 202 using R studio as well as CSE 102 and CMSE 201 which used other applications but also worked with coding skills. I loved learning new things and different ways of completing tasks throughout the several coding classes. They encouraged me to work better in a "roll with the punches" kind of manner which is typically what I'm used to in my everyday life- working as a waitress. Problem solving and figuring things out for myself is extremely rewarding and helps me learn in my own way and at the end of the day sticks with me rather than being taught or forced to memorize definitions without any "hands on" experience.
