

Weekly Writing - Week 0

Brett Taylor

30 August, 2025

1. Thoughts on all code being Chat gpt and focusing on concepts. or learn by trial and error.

I personally believe AI is the future and will eventually take the role of many coding positions. Not only do I think it would be easier to learn the concepts if we were to let Chat gpt do the coding, but I also think that learning how to use chat gpt to solve problems would be very beneficial in our future as I believe that the ability to use AI in our jobs will become a required skill.
