1. What are your thoughts on all coding is done by gpt and we do more in concepts or do we wanna learn in trial tiers and error sort of like actual coding so we understand it better

I think it depends. I believe GPT could be useful in doing the typing if I tell it to set a base for the coding and I tell it exactly what to do and I can change it as I please, while I do the general thinking as well. If the goal is real understanding, I will need some trial and error reps without AI to at least understand what I am dealing with; if the goal is speed, I will get GPT to work on a general mainframe while I do the design and innovation. (<https://docs.github.com/en/get-started/writing-on-github/getting-started-with-writing-and-formatting-on-github/basic-writing-and-formatting-syntax#styling-text>)).

If you'd like to add a header, make sure you do so on a new line and use 2-4 #'s followed by a space.
